

An interactive guidance throughout the patient journey

Fighting common patient education challenges

Challenges many healthcare teams face when informing and supporting patients.

Information overload

Too much information in a limited consultation time

Limited education time

Patient education is often compressed before or after treatment

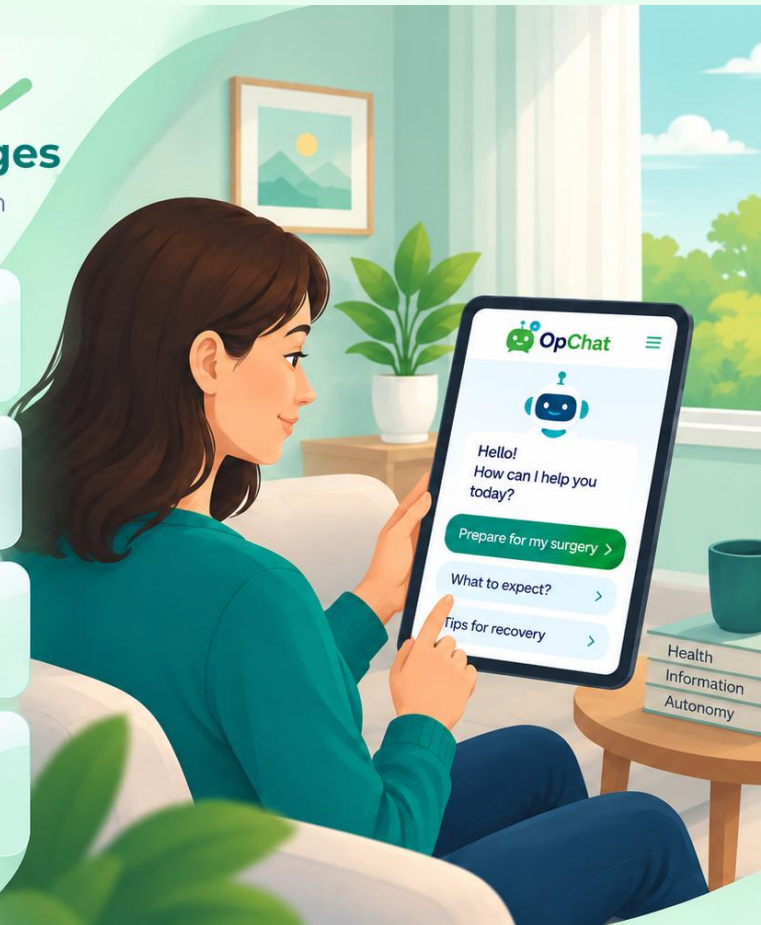

Repetitive questions

Healthcare teams spend time repeating routine explanations

Engagement drops later

Instructions may be forgotten once patients return home

**Transform your existing patient information into an
intuitive, step-by-step conversational experience.**

The right information at the right moment.

From medical content to interactive patient guidance

WHY CHOOSE OpChat?

Validated content

Reviewed and validated by your team

Multilingual guidance

Supports patient understanding and autonomy

No patient data retained

Anonymous patient experience

Fewer repetitive questions

Routine explanations reduced

Engagement analytics

Anonymized insights to improve communication

Easy to update

Recommendations evolve without redesign

Educating and supporting the patient every step of the way
